For all of the questions on the following three pages, make sure you clearly explain your reasoning and show your work. You may use a calculator (you may not program information into your calculator) but may not use any other outside materials such as books or notes. If you are unsure of how to interpret any of the questions, please ask me for help. On some of the following questions, you have a choice of which parts to answer. Circle the letters of the parts you want me to mark. When you are done, please hand your exam in to me at the front and then either wait quietly in your desk or in the hallway. This quiz is scheduled for 20 minutes at which time class will resume.

Total Grade:  /40 (i.e. 10% of the final grade)
1. (15 marks in total) For three out of four of the following questions, give a short answer in the space provided. Clearly show which ones you want me to grade. Show your reasoning and/or your work.

a. Offer an explanation of why Pittsburgh has such high SO₂ levels.

b. Which are the major sources of lead pollution?

c. Describe the consequences if the oxygen level in the atmosphere were to double.

d. Clearly describe why H₂S is added to natural gas.
2. (25 marks in total) Balance each of the following reactions. Show your work!!!!!

a) \[ \text{CO}_2 + \text{S}_8 \rightarrow \text{CS}_2 + \text{O}_2 \]

b) \[ \text{C}_3\text{H}_8 + \text{Br}_2 \rightarrow \text{C}_3\text{H}_8\text{Br}_3 + \text{HBr} \]

c) \[ \text{C}_3\text{H}_7\text{Cl} + \text{Zn} \rightarrow \text{C}_6\text{H}_{14} + \text{ZnCl}_2 \]

d) \[ \text{O}_2 + \text{P}_4 \rightarrow \text{P}_2\text{O}_5 \]

e) \[ \text{Na} + \text{I}_2 \rightarrow \text{NaI} \]
Chemistry 500, Second Quiz

Spring 1998

For all of the questions on the following two pages, make sure you clearly explain your reasoning and show your work. You may use a calculator (you may not program information into your calculator) but may not use any other outside materials such as books or notes. If you are unsure of how to interpret any of the questions, please ask me for help. On some of the following questions, you have a choice of which parts to answer. Circle the letters of the parts you want me to mark. When you are done, please hand your exam in to me at the front and then either wait quietly in your desk or in the hallway. This quiz is scheduled for 30 minutes at which time class will resume. Show all of your work!!!!!!!!!!!!!!!

Total Grade: /40 (i.e. 10% of the final grade)
1. (15 marks in total) For *three out of four* of the following questions, give a short answer in the space provided. Show your reasoning and/or your work.

   a. Describe the relationship between Ultra-Violet light and $O_2$.

   b. Clearly explain what the frequency and amplitude of a wave are.

   c. Give an example of a specific halon and explain how halons relate to the ozone hole.

   d. Clearly describe the structure of the atom using $^{32}\text{S}$ as an example.
2. (25 marks in total) For the following molecules give the Lewis electron structure in the space provided. Show your reasoning, any assumptions you make, and/or your work.

H

H N C H

H C C C C F

H H

C C C C

H H

O

H C C C Cl

H H H

H C C C O H

For all of the questions on the following two pages, make sure you clearly explain your reasoning and show your work. You may use a calculator (you may not program information into your calculator) but may not use any other outside materials such as books or notes. If you are unsure of how to interpret any of the questions, please ask me for help. On some of the following questions, you have a choice of which parts to answer. Circle the letters of the parts you want me to mark. When you are done, please hand your exam in to me at the front and then either wait quietly in your desk or in the hallway. This quiz is scheduled for 30 minutes at which time class will resume. Show all of your work!!!!!!!!!!!!!!

Total Grade: /40 (i.e. 10% of the final grade)
1. (20 marks in total) For two out of three of the following questions, give a short answer in the space provided. Show your reasoning and/or your work.

a. Clearly describe what is meant by the term “clatherate” and how it relates to global warming.

b. Draw the Lewis structures of five structural isomers of $\text{C}_6\text{H}_6\text{O}$.

c. Clearly describe what is meant in Chemistry by the term “mole”.
2. (20 marks in total) For *four out of six* of the following compounds, draw their Lewis structures, name their key functional group, and describe a use for the compound. [Be sure you draw in each atom and give it the correct number of bonds.]

a. Acetone

b. Diethyl Ether

c. Acetic Acid

d. Ethyl Acetate

e. Benzene

f. Acetylene.
Chemistry 500, Fourth Quiz

For all of the questions on the following two pages, make sure you clearly explain your reasoning and show your work. You may use a calculator (you may not program information into your calculator) but may not use any other outside materials such as books or notes. If you are unsure of how to interpret any of the questions, please ask me for help. On some of the following questions, you have a choice of which parts to answer. Circle the letters of the parts you want me to mark. When you are done, please hand your exam in to me at the front and then either wait quietly in your desk or in the hallway. This quiz is scheduled for 30 minutes at which time class will resume. Show all of your work!!!!!!!!!!!!!!!

Total Grade: /40 (i.e. 10% of the final grade)
1. (20 marks in total) For two out of three of the following questions, give a short answer in the space provided. Show your reasoning and/or your work.

a. Clearly describe the difference between a H-bomb and an A-bomb.

b. Draw the Lewis structures of three polymers and give their names.

c. Clearly describe how crude oil is processed to give the maximum yield of gasoline.
2. (20 marks in total) Below, clearly describe, using text and diagrams, the design of a nuclear power reactor. Include in you discussion how this systems generates electricity.
Chemistry 500, Final Exam

Spring 1998

Student Number: ______________________

For all of the questions on the following six pages, make sure you clearly explain your reasoning and show your work. You may use a calculator (you may not program information into your calculator) but may not use any other outside materials such as books or notes. If you are unsure of how to interpret any of the questions, please ask me for help. On some of the following questions, you have a choice of which parts to answer. Circle the letters of the parts you want me to mark. Give clear explanations/reasoning for each of your answers. Use diagrams in your answers where appropriate. When you are done, please hand your exam in to me at the front and then either wait quietly in your desk or in the hallway. This exam is scheduled for 2 hours.

Total Grade: /100 (i.e. 50% of the final grade)
1. (30 marks in total) For two out of three of the following, answer the questions. Use the back of this page if necessary.

a. Which are the major sources of ozone at ground level and in the ozone layer? Where do you want ozone and why?

b. What are halons and what are their uses and environmental effects?

c. For the molecule \( \text{C}_2\text{H}_4\text{O} \), calculate the percent composition for all of the elements, calculate its molecular weight, and draw three structural isomers.
2. (10 marks in total) Balance all of the following reactions. Show your reasoning and/or your work.

a. \( \text{Fe}_2\text{S}_3 + \text{P}_4 \rightarrow \text{Fe}_3\text{P}_2 + \text{S}_8 \)

b. \( \text{C}_2\text{H}_2 + \text{Cl}_2 \rightarrow \text{C}_2\text{H}_2\text{Cl}_4 \)

c. \( \text{NO}_2 + \text{H}_2 \rightarrow \text{NH}_3 + \text{H}_2\text{O} \)

d. \( \text{C}_2\text{H}_4\text{Cl}_2 + \text{O}_2 \rightarrow \text{CO}_2 + \text{H}_2\text{O} + \text{Cl}_2 \)
3. (20 marks in total) For four out of five of the following questions, give a short answer in the space provided. **Show your reasoning and/or your work.**

a. Define the term isotope and give the three important isotopes of hydrogen.

b. Explain why sticking your hand in a hot oven for 5 seconds will not burn it but touching the oven rack in the same oven for even a fraction of a second will produce a burn.

c. Giving your detailed reasoning, predict the effect on global warming of an increase in the amount of rice grown.

d. Give a description of how X-ray diffraction works.

e. What causes the rank of coal to change over time and how does this affect its chemical composition.
4. (20 marks in total) For *four out of six* of the following compounds, draw their Lewis structures, name their key functional group, and describe a use for the compound. [Be sure you draw in each atom and give it the correct number of bonds.]

a. Acetone

b. Diethyl Ether

c. Acetic Acid

d. Ethyl Acetate

e. Benzene

f. Acetylene.
5. (20 marks) For the following molecules give the Lewis electron structure in the space provided. Predict the bond distances and angles around each atom. Show your reasoning, any assumptions you make, and/or your work.
